

LORRAINE J. HWANG

Professional Preparation:

| | | |
|------------------------------------|------------------------------|----------------------------------|
| University of California, Berkeley | Geophysics | BA, Honors, Phi Beta Kappa, 1985 |
| California Institute of Technology | Seismology | MS, NSF Graduate Fellow, 1987 |
| California Institute of Technology | Seismology | PhD, 1990 |
| United States Geological Survey | Seismology | NRC Postdoctoral Fellow, 1991-93 |
| University of California Extension | Financial Accounting | 2006 |
| University of California Extension | Management Accounting | 2007 |
| University of California Extension | Foundations of Public Policy | 2009 |

Appointments:

| | |
|--------------|---|
| 2012-present | Associate Director, Computational Infrastructure for Geodynamics, University of California, Davis, Davis, CA |
| 2007-2012 | Research Coordinator, California Institute for Energy and Environment, University of California, Berkeley, Sacramento, CA |
| 2007 | Implementations Manager, Revionics, Granite Bay, CA |
| 2005-2006 | Consultant/Analyst, Network for Earthquake Engineering Simulation, Davis, CA |
| 2001-2005 | Senior Implementation Manager, Decision Academic Graphics, Ottawa, ON |
| 2001 | Project Analyst, University of California, Davis |
| 2000 | Project Manager, Community College Foundation, Sacramento, CA |
| 1993-1994 | Visiting Assistant Professor of Physics, Claremont McKenna College |
| 1991-1993 | Research Associate (National Research Council Postdoctoral Fellow), United States Geological Survey, Pasadena, CA |
| 1993 | Network Analyst, California Institute of Technology, Pasadena, CA |
| 1985-1990 | Graduate Teaching Assistant, Graduate Research Assistant, California Institute of Technology, Pasadena, CA |
| 1982-1986 | Physical Science Aide, United States Geological Survey, Menlo Park, CA |
| 1982-1985 | Student Assistant, Berkeley Seismological Laboratory, Lawrence Berkeley Laboratory, UC Berkeley, Berkeley, CA |

Products:

Selected Relevant Publications:

Synergistic Activities:

- **Project Management:**
 - Manage day-to-day operations, project planning, outreach and strategic initiatives for the Computational Infrastructure for Geodynamics, an NSF supported cyberinfrastructure facility with 79 national and international member institutions and its collaborations and partnerships including initiatives in high performance computing and software citation.
 - Provide project management and program development elements for Electric Grid Research and West Coast Carbon Sequestration Partnership (WESTCARB) working with partners across multiple private, public and governmental institutions contributing to program planning, project development and implementation, budget and schedule tracking, reporting, technical assistance, public outreach, and coordination. Serve as program lead for WESTCARB Regional Characterization coordinating and managing over \$5 million of research for geologic characterization and seismic risk for carbon sequestration. Develop statements of work and budgets, and review deliverables. Manage contract and budget changes. Develop science program for next project phase identifying research and principal investigators.
- **Professional Service:** Meeting Organizer and Program Committee Member for WSSSPE 3, WSSSPE 4, WSSSPE 5 and 2016 & 2017 Science Gateways. Member of FORCE11 Software Citation and Software Citation Implementation, and IRIS HPC Working Groups. WESTCARB representative to the Interstate Oil and Gas Compact Commission Task Forces on Carbon Capture and Geologic Storage, and on Offshore CO₂ Storage – Legal and Regulatory issues; participates on the Technical Advisory Team for the California Carbon Capture and Storage Review Panel.
- **Innovations in Teaching and Training** – Led development of web based tool and database for software citation. Development of Jupyter notebook for software training. Initiated and run CIG webinar series which draws from a pool of experts from mathematicians, to computer scientists, and to geoscientists, to bring together a cross-cutting community of faculty, students and researchers to both inform and disseminate knowledge on the tools and methodologies employed to further the study of problems in geodynamic. Worked in conjunction with UC Berkeley to redesign portal for the online WESTCARB Carbon Atlas for research and outreach/education.
- **Industry Collaborations** – Projects managed by California Institute for Energy and Environment included collaborations with EPRI, PG&E, SDG&E, SCEC, CAISO, PNNL, BPA & Southern Company as contractors or stakeholders providing in-kind support.
